

- Check-in / Check-out Module for asset tracking and transfer
- Bar code scan asset and employee badges for quick data retrieval and check-out
- Allows immediate user interaction without costly integrations.
- Low monthly fee with unlimited asset upload, view only users and check-in check-out users
- Centralized asset database where you can upload, group and link assets
- Add calibrations, certificates, warranty/purchase information, manuals, photos and more to each asset or group
- Print your own QR Code Stickers for calibrations, asset / asset group and location information
- Move assets between locations, departments or employees

An Asset Is What You Make Of It

Group and manage your assets by specific employee, truck, location, tool trailer, even warranties and contract information. Set reminders for assets due for calibration or when checked out to an employee or temporary location. We'll assist in customizing your site for the way you need it and offer complimentary training for all admins and users.
